

VAANIKIT: EDUCATOR PLAYBOOK

Verification & Algorithmic Literacy Network Initiative — Offline Toolkit

Team Lead: Manasvi Gangrade | Co-Lead: Suhani Sharma

WHAT IS VAANIKIT?

VaaniKit is an offline-friendly pedagogical field manual designed to bring the behavioral learning loop of Project VANI into classrooms, rural community halls, and youth clubs without requiring active internet connectivity. It equips facilitators to turn passive audiences into active, critical verifiers through structured roleplays, flashcards, and forensic observation.

1. THE 5-STAGE BEHAVIORAL VANI LOOP

01

THE FEED

Simulate authentic, high-speed information exposure mimicking WhatsApp, Instagram, or YouTube.

02

THE FREEZE

Introduce the mandatory 10-second impulse delay before sharing or reacting. Break the emotional surge.

03

THE REVEAL

Expose forensic tells: synthetic cadences, fake seals, uncanny lip-synchs, and hidden emotional bait.

04

RESILIENCE SCORE

A gamified metric (0-10) measuring caution and verification instincts across repetitive runs.

05

THE MULTIPLIER

Equip the learner with reproducible 'tells' so one informed youth insulates their entire family group.

2. THE THREE ARCHETYPES DISSECTED

THE FAMILIAR VOICE (Voice Clone)

AUDIO DEEPFAKE

Scenario: Cloned audio note posing as family/friend demanding urgent money or links.

The Tell: Listen for robotic breathlessness and perfectly flat sentence-end cadences.

THE BREAKING NEWSREADER (Synthetic Anchor)

AVATAR MISINFORMATION

Scenario: Polished studio desk and ticker broadcasting fabricated civil or economic crises.

The Tell: Watch mouth borders against teeth, unnatural blinking rates, and nameless news tags.

THE KIND OFFICIAL (Fabricated Scheme)

PHISHING & EXPLOITATION

Scenario: Free laptops, scholarships, or immediate payouts exploiting aspirations.

The Tell: Official logos paired with suspicious shortened URLs; requests for OTP or upfront fees.

VAANIKIT: FIELD GUIDE & WORKSHOP SCRIPT

HANDS-ON OFFLINE VERIFICATION WORKSHOP FOR EDUCATORS & YOUTH MENTORS

3. THE SIX GOLDEN VERIFICATION CARDS (FOR CLASSROOM DISPLAY)

RULE 1: PAUSE ON THE SPIKE If an item triggers rage, intense panic, or instant validation, halt. Emotional surges are designed payloads.	RULE 2: NAME THE SOURCE OUT LOUD Ask aloud: 'Who created this, and how would they know?' If you cannot name both, it's hearsay with graphics.
RULE 3: LISTEN TO THE TAIL Voice clones betray themselves in the last second of sentences: monotone pitch drop, zero breath, no ambient room decay.	RULE 4: REVERSE-SEARCH THE VISUAL Screenshots and breaking photos are frequently recycled from crises 5+ years prior in unrelated locations.
RULE 5: FORWARD THE TELL, NOT THE CLIP Never forward false media to 'warn' others. Instead, screenshot and explain specifically why it is fabricated.	RULE 6: MONEY NEVER REQUIRES A PIN Entering a UPI PIN or banking credential ONLY transfers money out. No government grant or prize asks for your PIN.

4. 45-MINUTE OFFLINE WORKSHOP BLUEPRINT

00 — 10 MIN	THE 'URGENT MESSAGE' ICEBREAKER Read aloud a hyper-urgent fake WhatsApp audio scenario. Ask the room who would forward immediately. Point out the visceral panic reflex before anyone questioned the source
10 — 25 MIN	ANATOMY OF A DEEFAKE ROLEPLAY Divide youth into pairs: one is the 'Scammer' crafting an emotional hook (welfare, panic), the other is the 'Auditor' spotting the 3 tells (tail cadence, URL anatomy, missing authority)
25 — 35 MIN	THE RESILIENCE SCORE BENCHMARK Conduct a 5-question oral simulation quiz. Score students on: Did they verify source? Did they halt the forward? Did they spot the payload? Target: 8/10 baseline
35 — 45 MIN	COMMUNITY ADVOCATE PLEDGE Each participant commits to becoming the 'family verifier' on WhatsApp groups. Distribute printed VaaniCards for home noticeboards and refrigerator placement
